

YASH RAJ

SOFTWARE ENGINEER

Karachi, Pakistan | +923351242118 | Yashmandhan608@gmail.com | [Github](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience designing, developing, testing, debugging, and maintaining web-based software applications using C#, ASP.NET MVC, .NET Framework, Web API, JavaScript, and Oracle Database. Experienced in developing maintainable enterprise applications, implementing RESTful APIs, integrating databases, troubleshooting technical issues, and following software development lifecycle practices. Strong understanding of Agile development, MVC architecture, object-oriented programming, code reviews, version control, and collaborative software development.

EDUCATION

Bachelor of Science in Computer Science — FAST-NUCES | Karachi, Pakistan

- Relevant coursework: Object-Oriented Programming, Software Design, Data Structures & Algorithms, Computer Networks, Computer Architecture, Design & Analysis of Algorithms.

EXPERIENCE

Software Engineer

ABC Technologies — Islamabad, Pakistan 2025 – 2026

- Designed, developed, tested, debugged, and maintained enterprise web applications using **C#, ASP.NET MVC, .NET Framework, JavaScript, and Web API**.
- Developed and maintained **RESTful Web APIs** for communication between frontend applications and backend services.
- Implemented MVC-based application components following object-oriented and modular software design principles.
- Designed and optimized database operations using **Oracle Database**, SQL queries, stored procedures, and database integration techniques.
- Enhanced existing software applications by implementing new features and resolving functional and technical issues.
- Participated in **Agile development activities**, sprint planning, requirement discussions, testing, and iterative feature delivery.
- Worked with Oracle databases and SQL queries for application data management.

SKILLS

Programming: C#, C++, Python, JavaScript, SQL

Microsoft Technologies: .NET Framework, ASP.NET MVC, ASP.NET Web API, Entity Framework

Web Development: RESTful APIs, JavaScript, HTML, CSS, MVC Architecture

Databases: Oracle Database, SQL, Database Design, Stored Procedures

Software Engineering: SDLC, Agile, OOP, Design Patterns, Software Architecture, Code Review, Debugging, Testing

Development Tools: Git, GitHub, Visual Studio, Postman

Professional: Problem Solving, Communication, Team Collaboration, Cross-Functional Collaboration, Technical Documentation

PROJECTS

Patient Management API | C# | ASP.NET Web API | Oracle | Entity Framework

- Designed and developed a backend Web API using modular routes, middleware, models, validation, and database integration.
- Implemented authentication concepts using JWT and structured request processing for secure and maintainable server-side development.
- Tested API endpoints, identified application issues, debugged errors, and refined endpoint behavior during development.

Premium Insurance Predictor API | Python, FastAPI, ASP.NET MVC | C# | JavaScript | Oracle

- Developed a RESTful Web API for machine-learning model inference using FastAPI.
- Implemented structured request handling, input validation, endpoint processing, and API testing.
- Organized the application into modular components to support maintainability and future enhancements.

NovaCare | Software Design Project

- Applied object-oriented programming and software-design principles to requirements, application structure, system design, and maintainability.
- Worked with structured software architecture and design concepts relevant to application development and lifecycle activities.
